

NRC CoC 9035

Prior to December 1984, individual DOE Field Offices were register as users. On December 19, 1984, Roy Garrison, DOE headquarters, requested NRC list Department of Energy, ATTN: Mr. Roy Garrison, DP-122.2, Washington, D.C. 20545 as the register user for a long list of NRC CoCs. The NRC CoC 9035, was one of the NRC CoCs on that list. For many years NRC issued an annual "NRC Directory of Certificates of Compliance for Radioactive Materials Packages" which gave listed the registered users for each NRC CoC. Letters of Registration were not always provided for these older CoCs mainly because of this listing. Since September 11, 2001, this list is no longer available to the general public.

There is no copy of a letter of Registration for DOE Headquarters for NRC CoC 9035 in the DOE docket file. DOE has been a user of this CoC for many years. Docket copies of the CoC contain a list of users and DOE is a register user. In addition, I have verified with NRC, that DOE Headquarters is a registered user of all the NRC CoCs shown on the points of contact list.
